DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 5, 18-42, 68-84, 102-118, 136, 138, 140, 142 and 145 drawn to a method of radially expanding and plastically deforming an expandable tubular assembly.

Group II, claim(s) 2, 4, 6, 43-67, 85-101, 119-135, 137, 139, 141 and 143, drawn to an apparatus.

Group III, claim(s) 7-14 and 149-152, drawn to an expandable tubular assembly.

Group IV, claim(s) 15-17 and 148, drawn to a lubricant.

Group V, claim(s) 144, 146 and 147, drawn to a lubrication system and method of lubricating.

2. The inventions listed as Groups I, II, III, IV and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires the step of coating the interior surface of tubular members with a lubricant and positioning the tubular members within a pre-existing structure. Group II is drawn to an apparatus formed of one or more tubular members radially expanded, and being a product, the process claims are not given patentable weight. Group III is drawn to an expandable tubular assembly requiring the particulars of the

lubricant which is not required by the invention of groups I and II. Group IV is drawn to a lubricant not requiring any structure or method required by the invention of Groups I or II. Group V is drawn to a lubrication system and method of lubricating requiring the step of providing a boundary lubrication and hydrodynamic lubrications which are not required by the invention of Groups I, II or III.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
